

Time Cycle Analysis

Advanced level

It is all about Time. As technical analysts, we are mainly using charts that represent price movements (Y-axis) in reference to time (X-axis). Accordingly, identifying price movements exclusively, irrespective of the time horizon (Y-axis) may answer only one part of the equation. Time Cycle analysis lends itself exclusively to identify the timing for a beginning of a move, its journey or its end.

By the end of this course you will be able to:

- Identifying & isolating cycles in order to predict the price movement

Course Outline

- How prices move?
- Major concepts and characteristics of the time cycles: Amplitude, Period, Phase and Phase difference
- Time Cycles principles:
 - ✓ Nominality
 - ✓ Summation
 - ✓ Harmonicity
 - ✓ Synchronicity
 - ✓ Proportionality
 - ✓ Variation
- Cycle Classifications
- Isolating Time Cycles
- Left and Right Translation
- Seasonal Cycles
- Centered envelopes channels
- Centering the Price Oscillator

Course's language

- Materials and slides in English,
- Elaboration and discussion in Arabic.

Target Audience

The course is designed for those interested in the investment field:

- Financial markets account officers and brokers
- Portfolio and Asset Managers
- Financial markets Investors

Prerequisites

- Basics of Technical Analysis Level 1
- Basics of Technical Analysis Level 2
- Technical Analysis Indicators Level 1
- Technical Analysis Indicators Level 2

Course Duration

- 2 Days (6 hours / day) in class
- 4 Days (3 hours / day) online

Training Venue

- According to client request

Course Date

- According to client request.

Course Fee

- According to financial proposal

This course entitles you to attend:

- None

Upon successful completion of this course, participants will obtain

- Training attendance certificate.
